

DPSG/Cir/16-17/Admn/06

Dated: 05 .04.16

Dear Parent,
Greetings!

Your cooperation has always motivated us to travel many milestones. The school after a lot of research in teaching techniques has devised a new policy from the session 2016-17 in the teaching-learning process of science subjects which will prepare the students for solving application based problems and incline them to develop a scientific temperament. Regarding the same the following points merit your kind attention:

- Activities related to the chapters will be conducted to help the students develop conceptual clarity.
- Chapter wise Multiple Choice Questions will be done.
- Open Text Based Assessment (OTBA), both seen and unseen passages will be a part of teaching and Formative Assessments. These OTBAs are based on high order thinking skills.
- Students will be assessed for FA's during the regular teaching periods through variety of tasks. Criteria and measures for assessment would be intimated at the start of every chapter.
- In order to prepare them for higher examinations, instead of dictating the notes, questions and answers, the teacher will discuss and give the bullet points referring to the question and make the students frame their own language. The correction work done by the concerned subject teacher will be as follows-

Class work		Homework	
Bullet points	Detailed Answer	Bullet points	Detailed Answer
100 % correction		100 % correction	50 % correction, 50 % work will be seen, but not corrected

Principal
